

LEARN, PRACTICE, COMPETE: BRINGING THE COMPETITIVE ARENA TO YOU

Dear Athlete,

As someone who is used to routine and regular competition, these must feel like challenging times. We understand it's just as important to stay on top of your mental fitness as it is your physical fitness, so we would like to show our support by offering you a new challenge.

We're providing **500 free Trader Experience places to athletes**, granting them access to our online learning portal. This digital platform supports students as they work towards achieving the accredited **Level 5 Advanced Diploma in Financial Trading** qualification.

Being a trader is much like being a professional athlete. It requires discipline, hard work, dedication and a competitive edge, which is why we're already working closely with a number of clubs and players from the Premier League, LFE, Premiership Rugby and more.

Developing your financial literacy and understanding of global markets

The course covers a range of topics, including:

- How the financial markets work
- What impacts prices in the stock market
- The concept of interest rates and how they influence the financial and property markets
- How foreign exchange markets operate

This version of the course is what we use for our own Junior Traders at **OSTC**. From here, you can choose to go for the full qualification by completing a two week period of trading and practical application. This industry recognised, fully accredited diploma can help you transition into a broad range of finance sector jobs.

Here's how to get started:

STEP 1

Simply [click here](#) to sign up for your login details to our financial market education portal.

STEP 2

Set up a free 30 day, professional trading simulated system so you can put the theory into practice. This will be available **within two weeks** of sign up.

STEP 3

Join new webinars covering daily market activity and what to look out for.

There'll also be a range of support services throughout the course, including:

- **Trading education**
- **General financial literacy education**
- **Professional financial qualifications advice for transition**
- **CV guidance for the finance sector**

If you're looking to build on your existing skillset and diversify your capabilities beyond sport, this could be your chance. You can learn new skills, open up a new career path and keep your competitive edge.

Places are limited, so please act fast

Take care and best wishes,

The ZISHI Team
